ENVOTECH

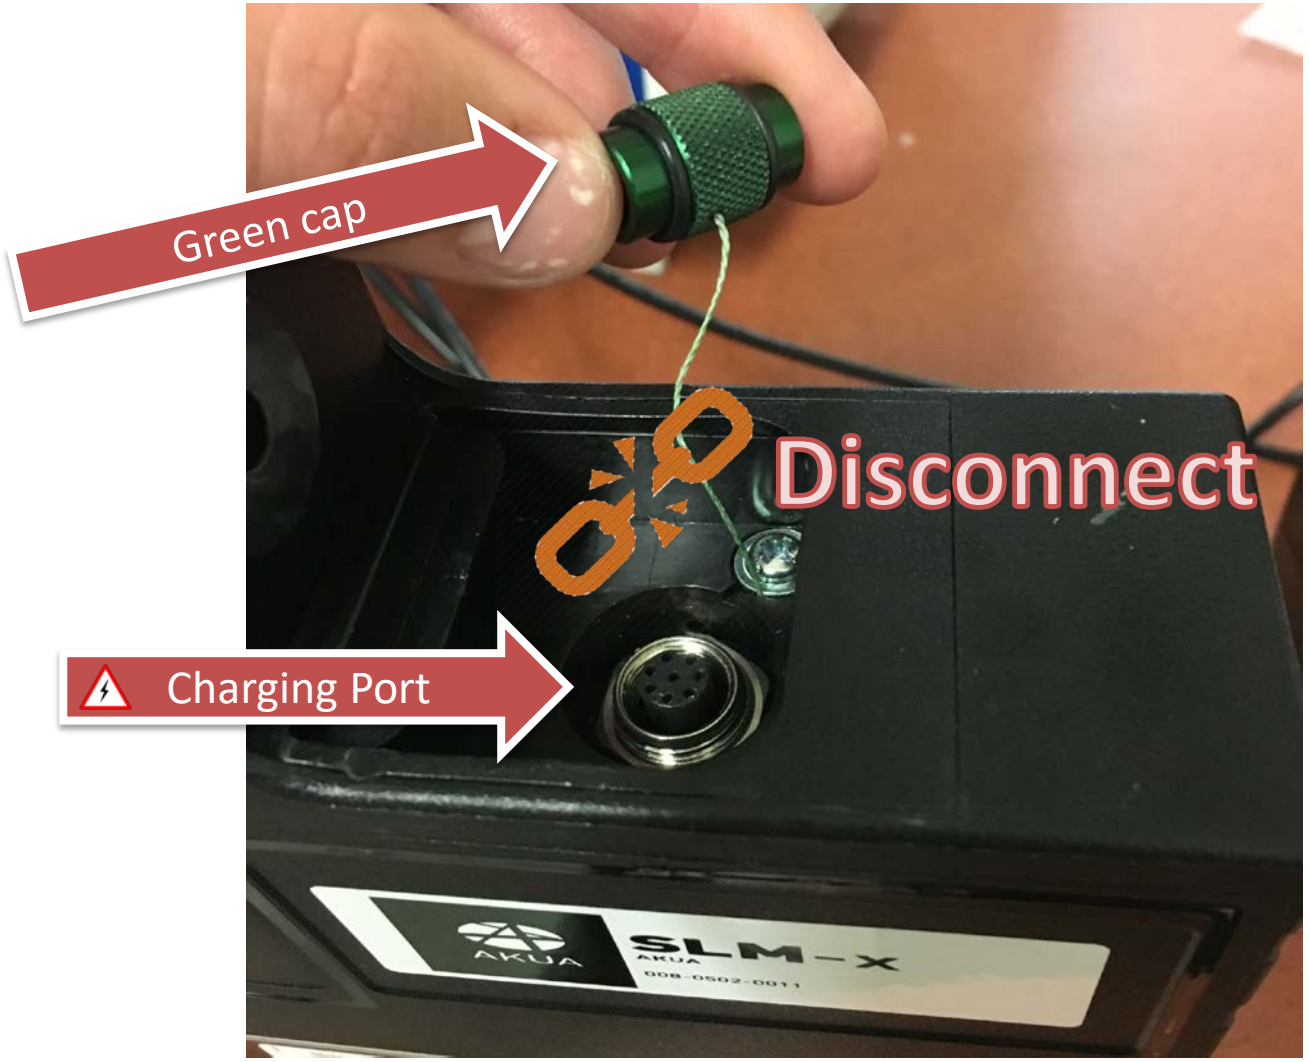
Slide door on top open.

AKUA

Reveals charging port and a green cap on a string

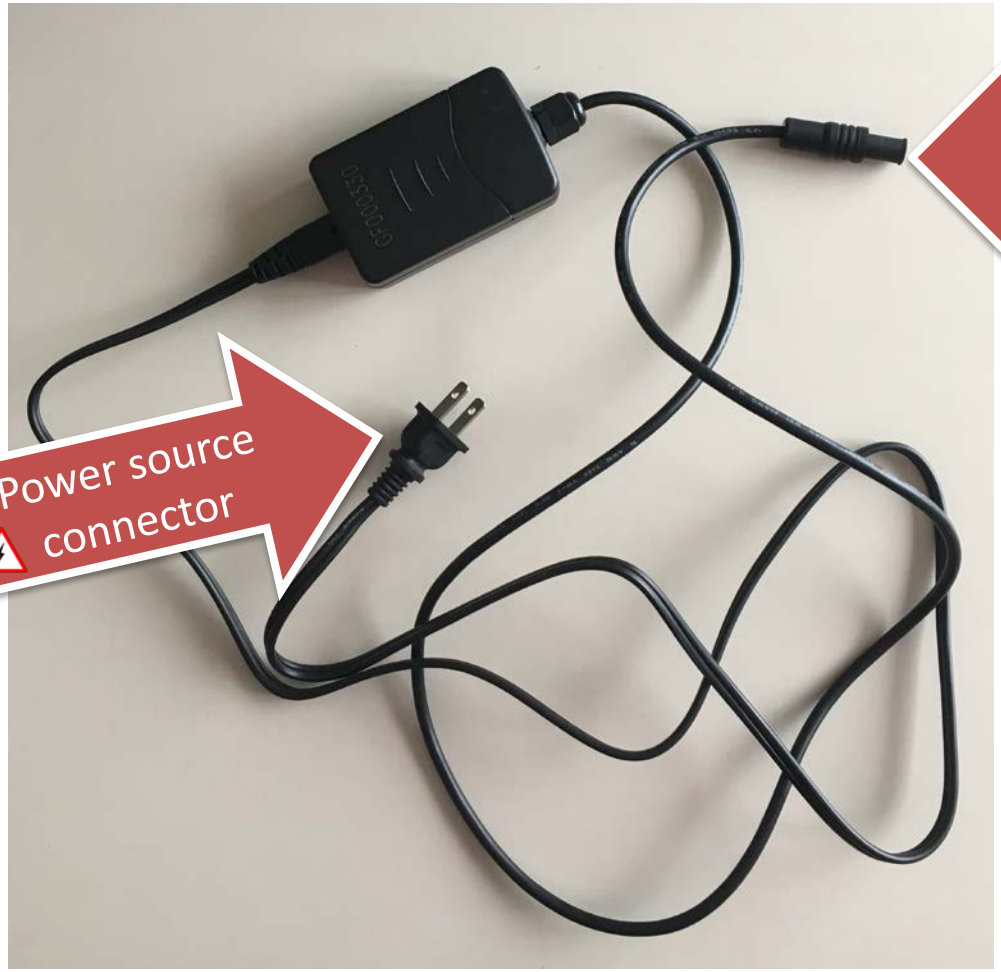
AKUA

Disconnect green cap by pulling up gently



AKUA

Plug the charger cord into a power source



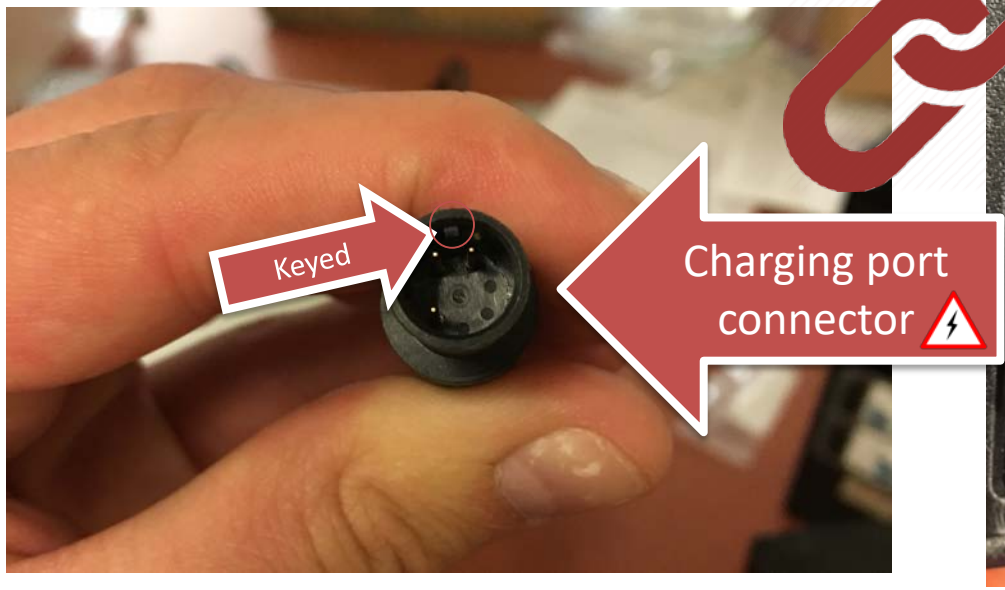
AKUA

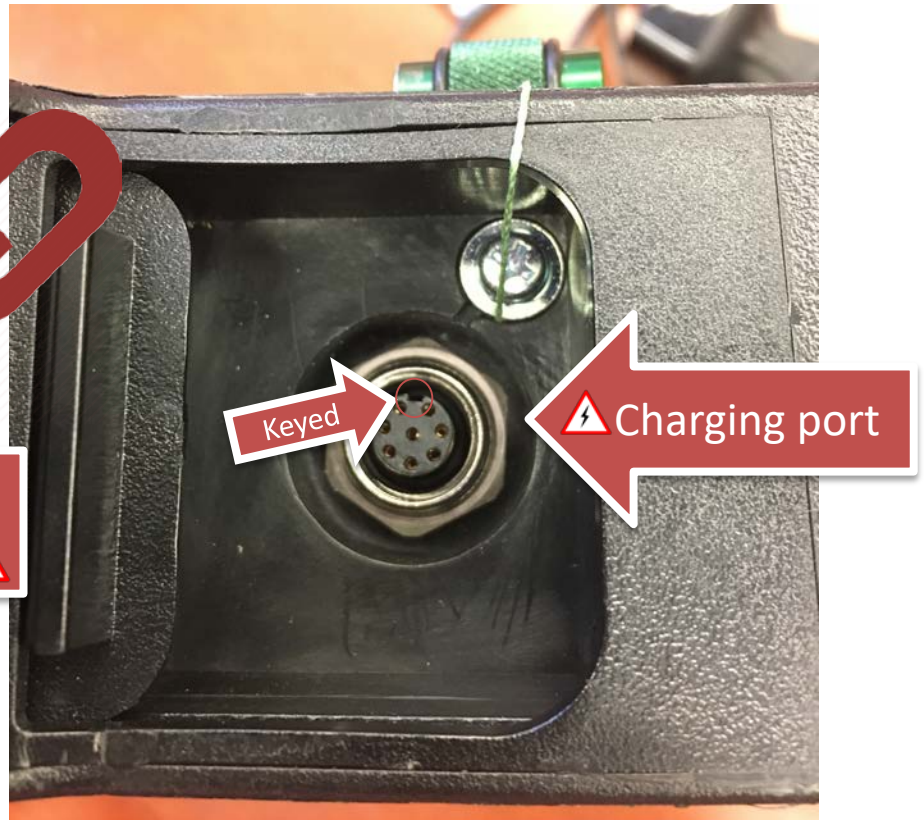
Plug charging cord into device.

AKUA

Plug the charging port connector into the charging port.

To plug in correctly, key the small black piece on the charging port connector to the space at the top of the charging port (See detail next slide).

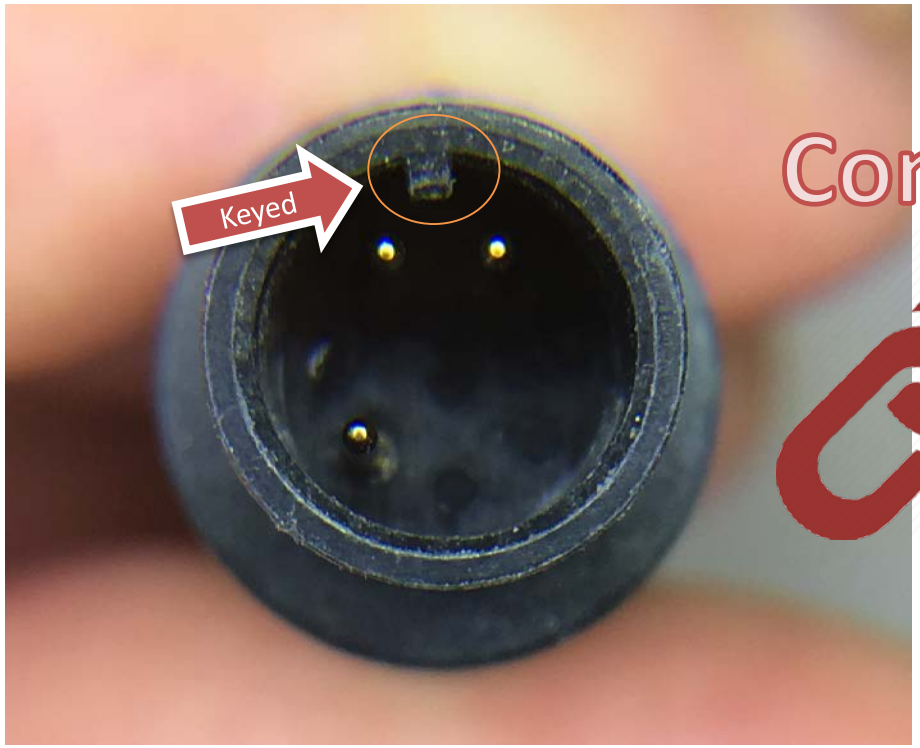




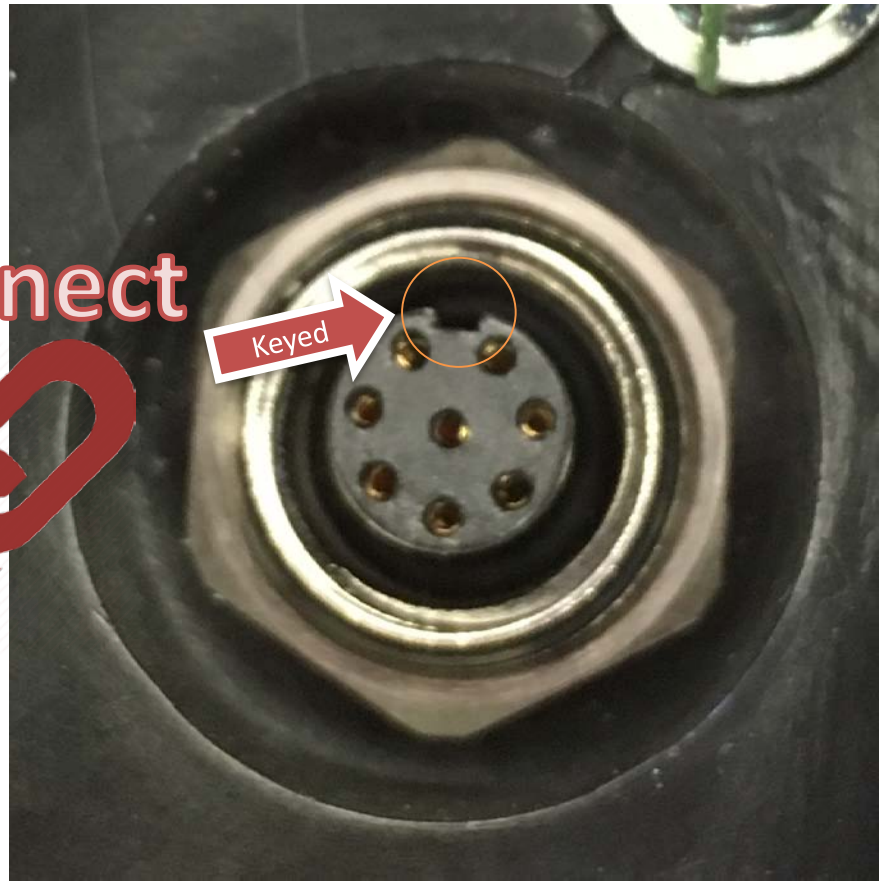
Connect

AKUA

(Detail for previous slide). Key small black piece on connector to the space at the top of the charging port



Connect

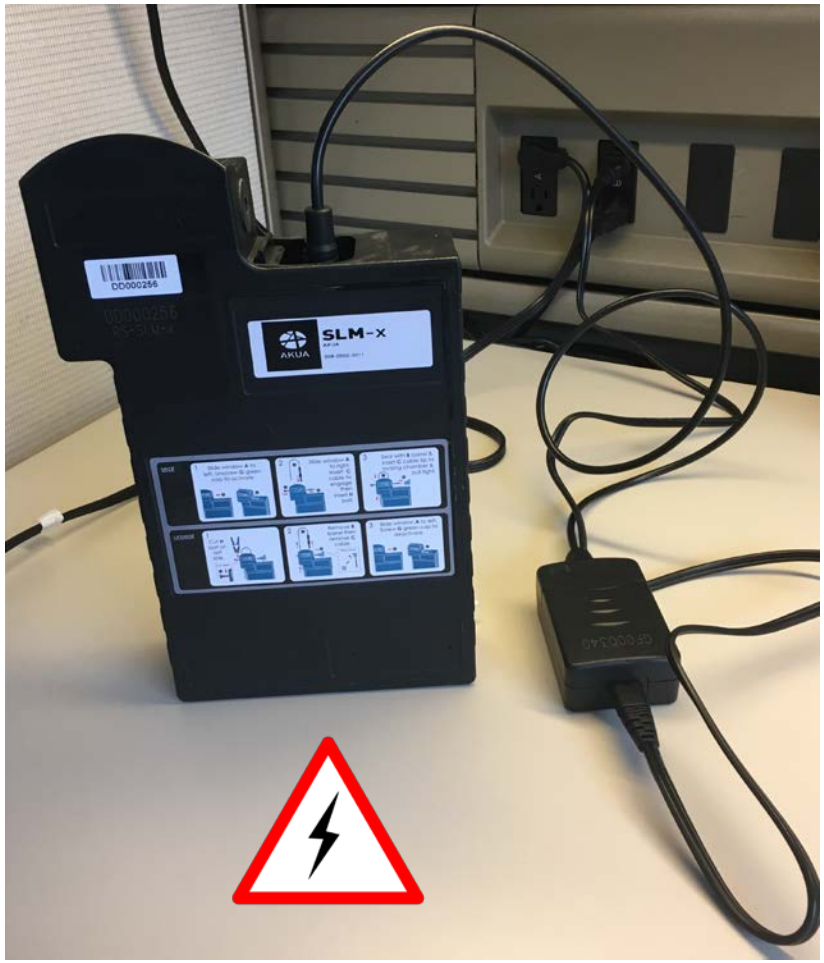


AKUA

If successfully charging, red light on charger will turn on.

AKUA

Allow to charge for 24 or more hours.

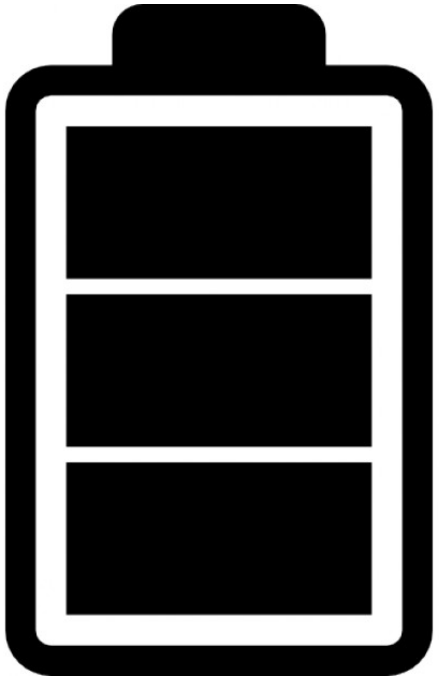


Note: A green light on the charger may turn on after some time, but is not an indicator of a full charge. Allow the device to charger for at least 12 hours to ensure full charge

AKUA

After 24+ hours, remove charger from the device. Device is now ON.

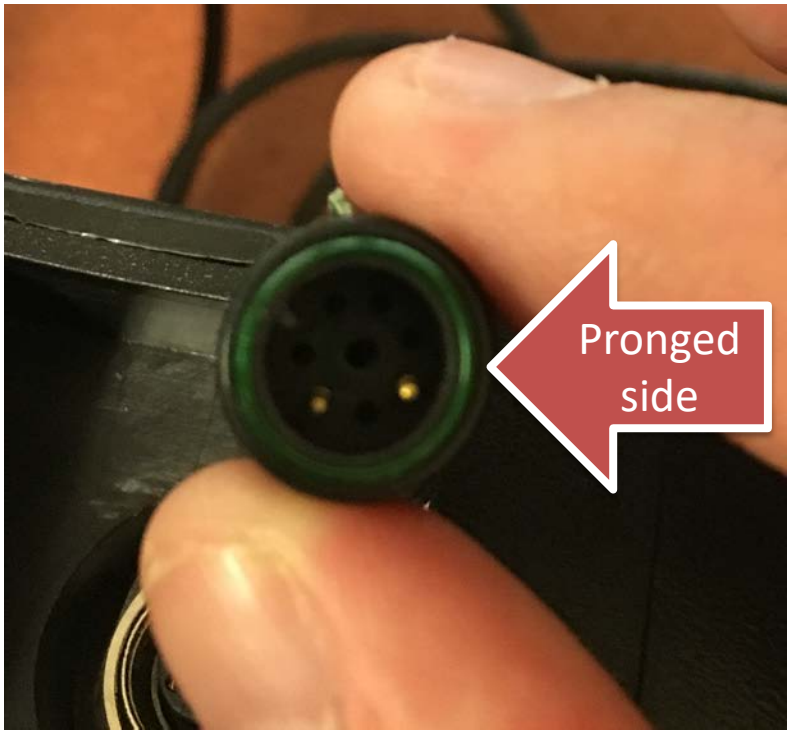
Charged & ON

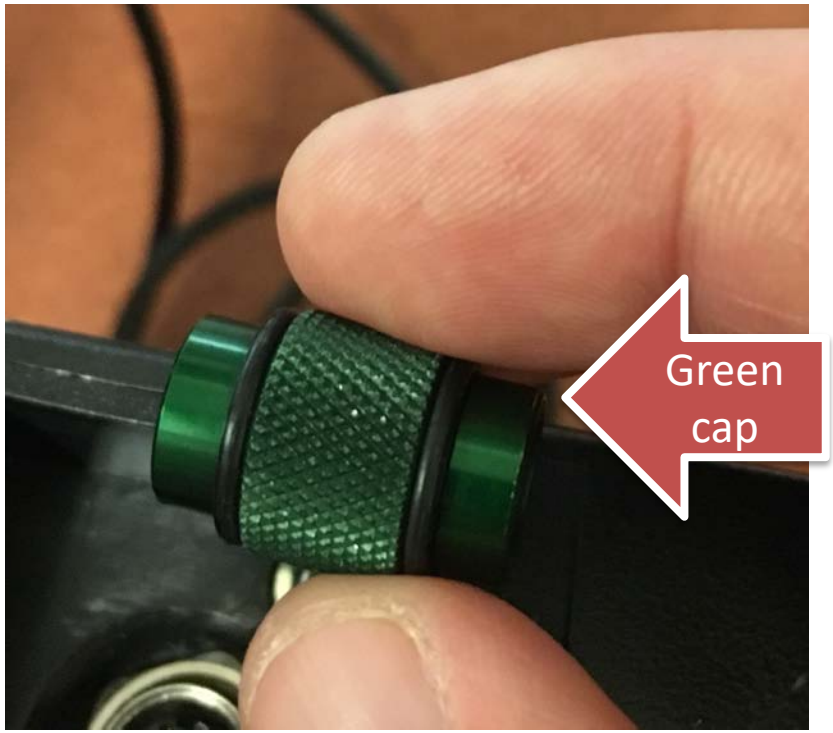


AKUA

To turn device OFF, connect green cap with the charging port, pronged side down.

To plug in correctly, match the small black piece on the green cap to the space at the top of the charging port (See detail next slide).



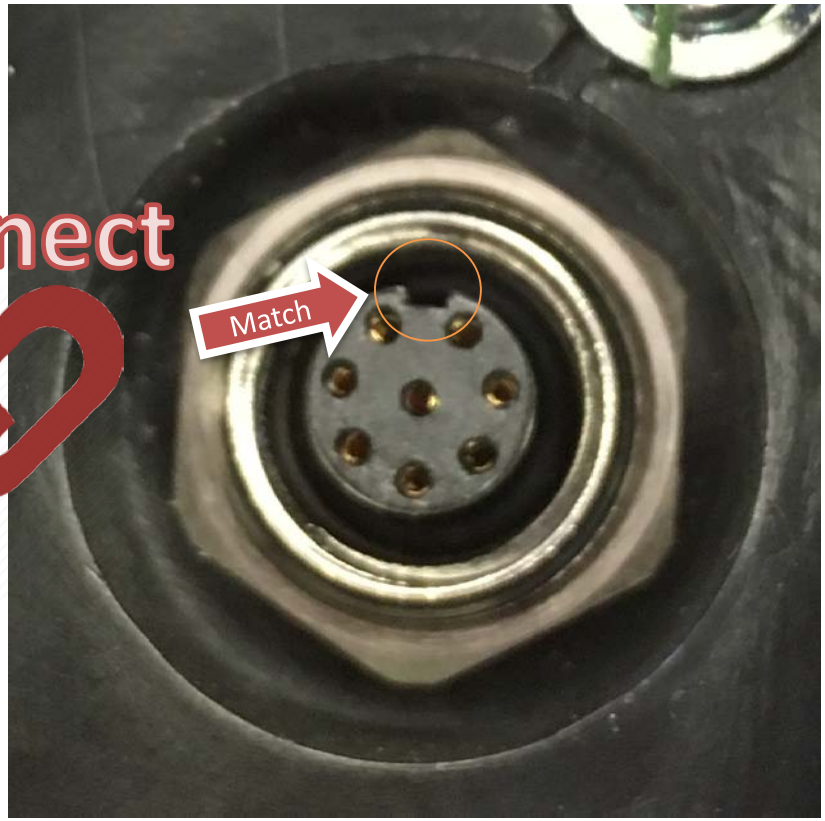


AKUA

(Detail Previous slide)

To plug in correctly, match the small black piece on the green cap to the space at the top of the charging port

Connect



AKUA

Device is now OFF. Will stay charged until use.

AKUA

Slide door shut.
